

A NEW GENERATION OF MEASURES

designed to directly address **Fairness, Equity, and Representation**

MHS, and two distinguished author teams, are developing a new generation of measures; the *Naglieri General Ability Tests* (Authors: **Jack A. Naglieri, Ph.D.**, Research Professor at the University of Virginia, **Kimberly Lansdowne, Ph.D.**, Founding Executive Director of the Herberger Young Scholars Academy at Arizona State University, and **Dina M. Brulles, Ph.D.**, Director of Gifted Education at Paradise Valley Unified School District in Arizona) and the *Gifted Rating Scales Second Edition* (Authors: **Steven I. Pfeiffer, Ph.D.**, Professor Emeritus at Florida State University, and **Tania Jarosewich, Ph.D.**, Principal and Senior Evaluator at Censeo Group). Both measures adhere to the AERA, APA, and NCME Standards for Educational & Psychological Testing with respect to Reliability, Validity, and Fairness.

Grades: K-9
Format: Online
Administration Type: Group

Author Team: Jack A. Naglieri, Ph.D., Kimberly Lansdowne, Ph.D., and Dina M. Brulles, Ph.D.

- IN DEVELOPMENT -

The *Naglieri General Ability Tests* are comprised of three brand-new tests expressly developed to help identify gifted students fairly and equitably. These tests measure general intellectual ability across **verbal** (Naglieri & Brulles), **nonverbal** (Naglieri), and **quantitative** (Naglieri & Lansdowne) content.

Test items are carefully designed to remove cultural influences, allow students to solve problems regardless of the language they speak, and significantly reduce the amount of formal knowledge required so the tests measure how well students 'think', rather than what students 'know'. Initial research has found minimal differences across gender, race/ethnicity, and parental education level.

The *Naglieri General Ability Tests* online portal automatically scores students' performance using local norms, providing school system stakeholders with multiple score options at the click of a button.

Ages: 4:0 to 18:11
Format: Online
Rater Types: Teacher & Parent

Author Team: Steven I. Pfeiffer, Ph.D. and Tania Jarosewich, Ph.D.

- IN DEVELOPMENT -

Children can display high potential across many areas outside of intelligence alone: creativity, leadership, artistic talent, motivation, intellectual, and academic ability. For decades, the *Gifted Rating Scales (GRS)* has been trusted worldwide to identify children for gifted and talented educational programs. It is among the most researched tests with over 30 articles published on its reliability and validity.

MHS, in partnership with **Steven I. Pfeiffer, Ph.D.** and **Tania Jarosewich, Ph.D.**, are proud to announce the *Gifted Rating Scales Second Edition (GRS 2)* is currently in development.

What's New?

- Parent form
- Automated calculation of local norms
- Option to select and administer specific scales
- School Age forms extending to age 18:11 years
- Ability to generate multi-rater reports
- Inconsistency Index (an indicator of potentially invalid response style)
- National norms updated in 2019 matching the 2018 U.S. census in terms of age, gender, race, and region (new Parent form includes parental education level)

About MHS.com

A leading publisher of scientifically validated assessments for more than 30 years, Multi-Health Systems Inc. (MHS) serves clients in educational, clinical, corporate, public safety, government, military, pharmaceutical, and research settings. MHS has grown to become an international company with products sold in more than 75 countries and translated into over 50 languages. With offices in North America and partners around the world, MHS is dedicated to strong product growth, an optimal user experience, and being digitally and globally driven. MHS has developed leading products such as the *Conners* suite of ADHD assessments, the *Level of Service* suite of assessments, and the *Emotional Quotient Inventory (EQ-i 2.0®)*. These products have demonstrated our commitment to innovation and quality.

"Through excellence in our people and products, we are the leading developer of innovative scientific assessments that help improve the quality of life for individuals and communities around the world."
